How to create a recovery drive in Windows 10

About "Recovery drive" in Windows 10

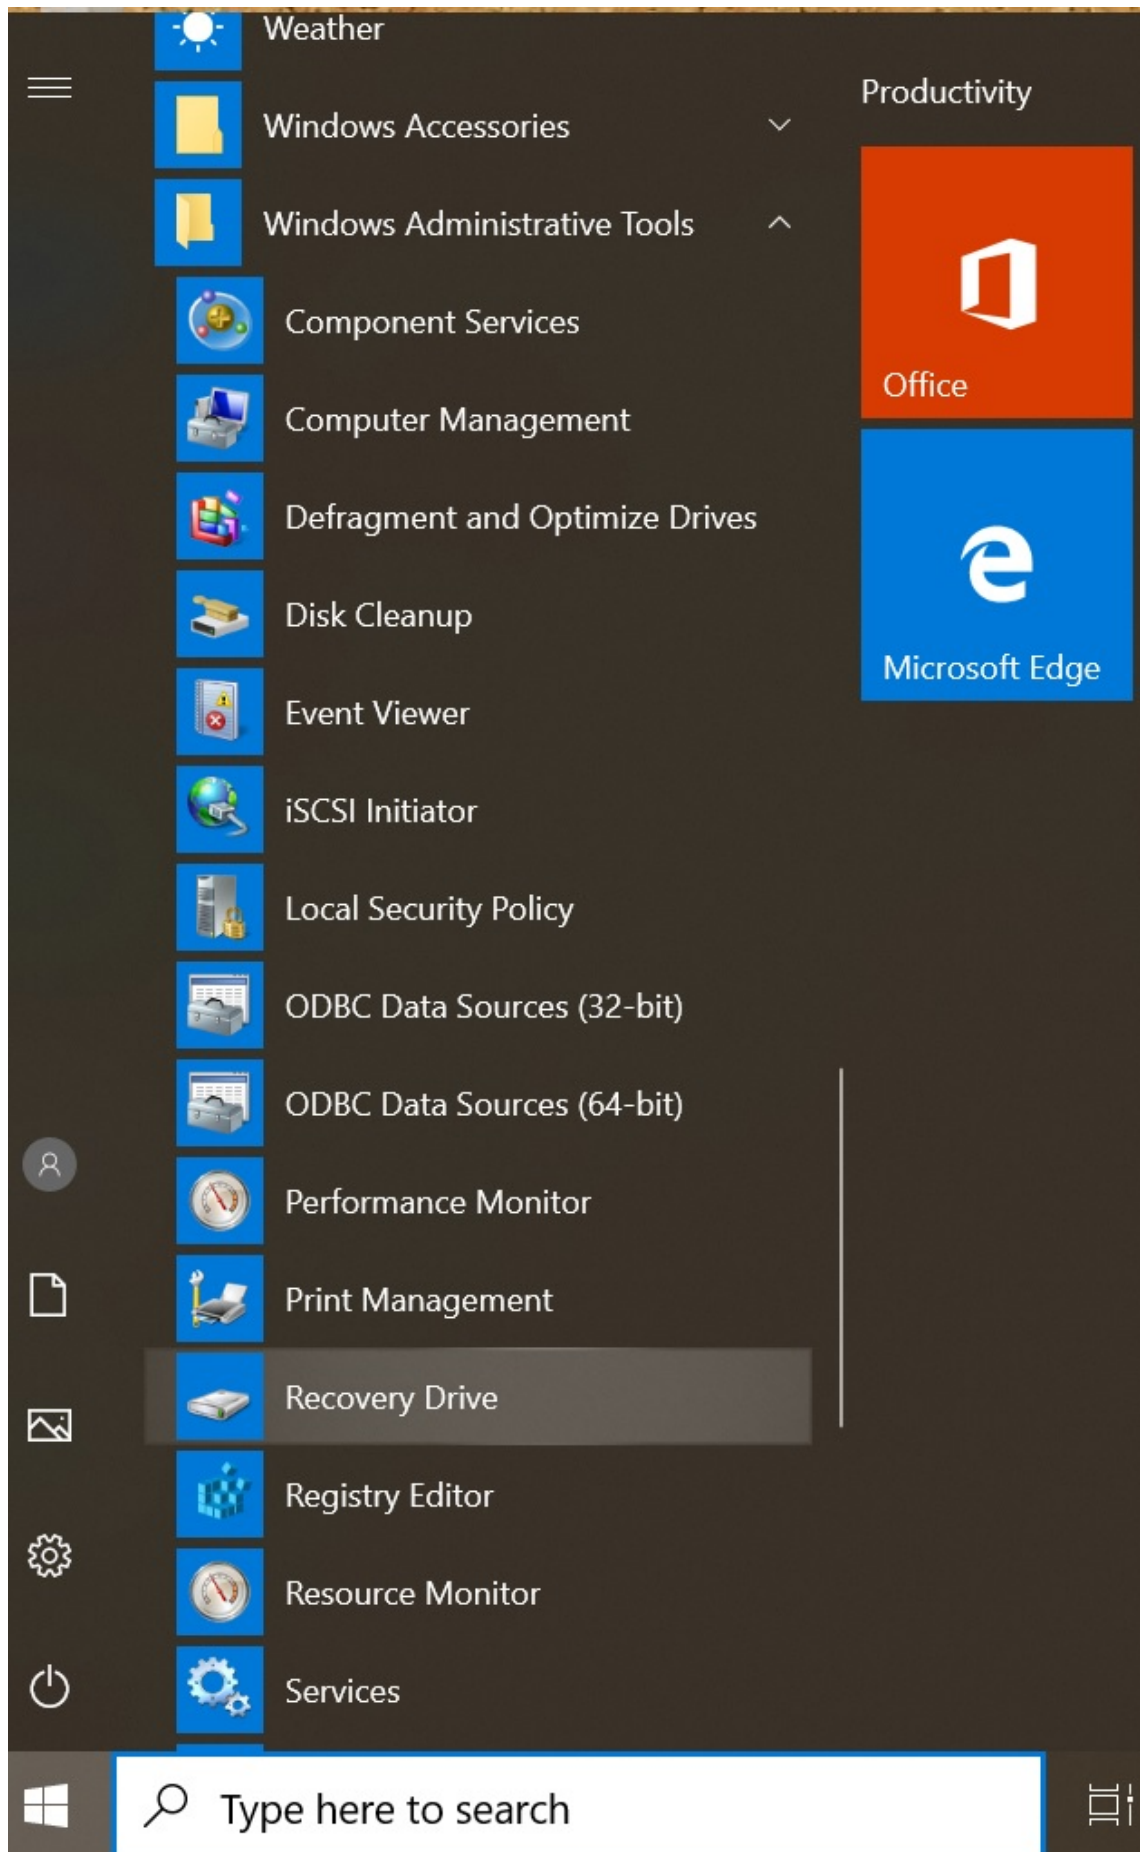

If trouble may happen like that your Windows 10 won't boot up, you can recover your Windows system with "Recovery drive" that you created in advance.

You need USB flash drive to create a recovery drive.(approx.32GB of USB flash drive is needed.)

How to create a recovery drive.

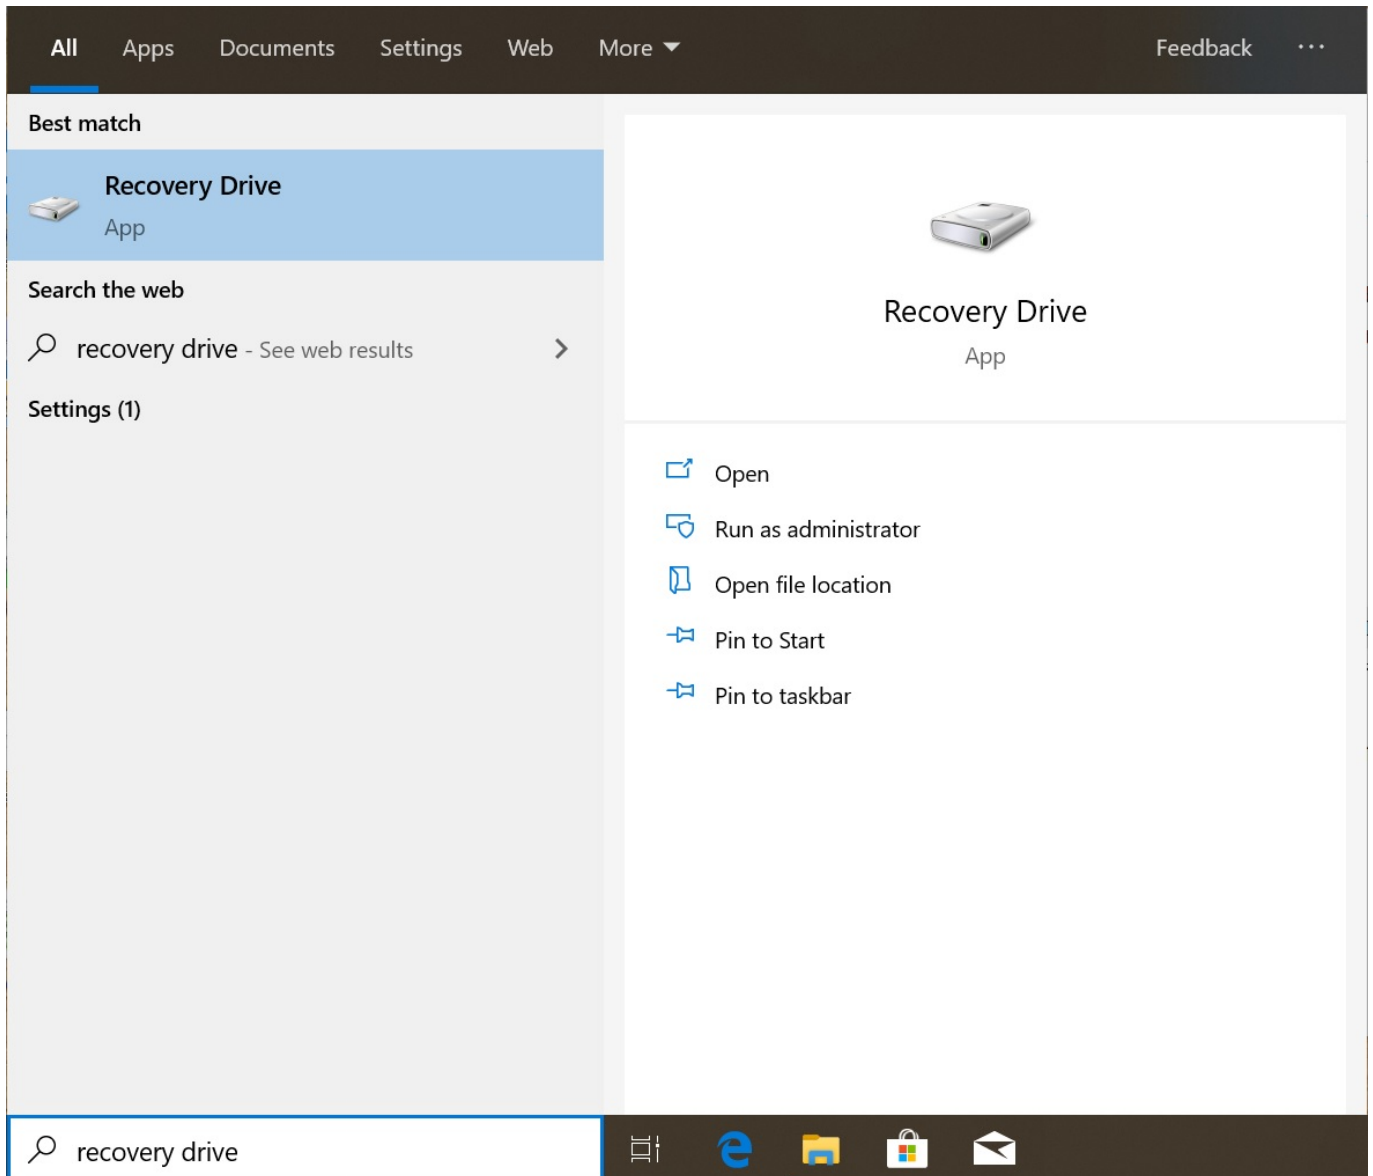

- 1.Open "Start menu", click "Windows Administrative Tools" and click "Recovery Drive".

Windowsの再インストール

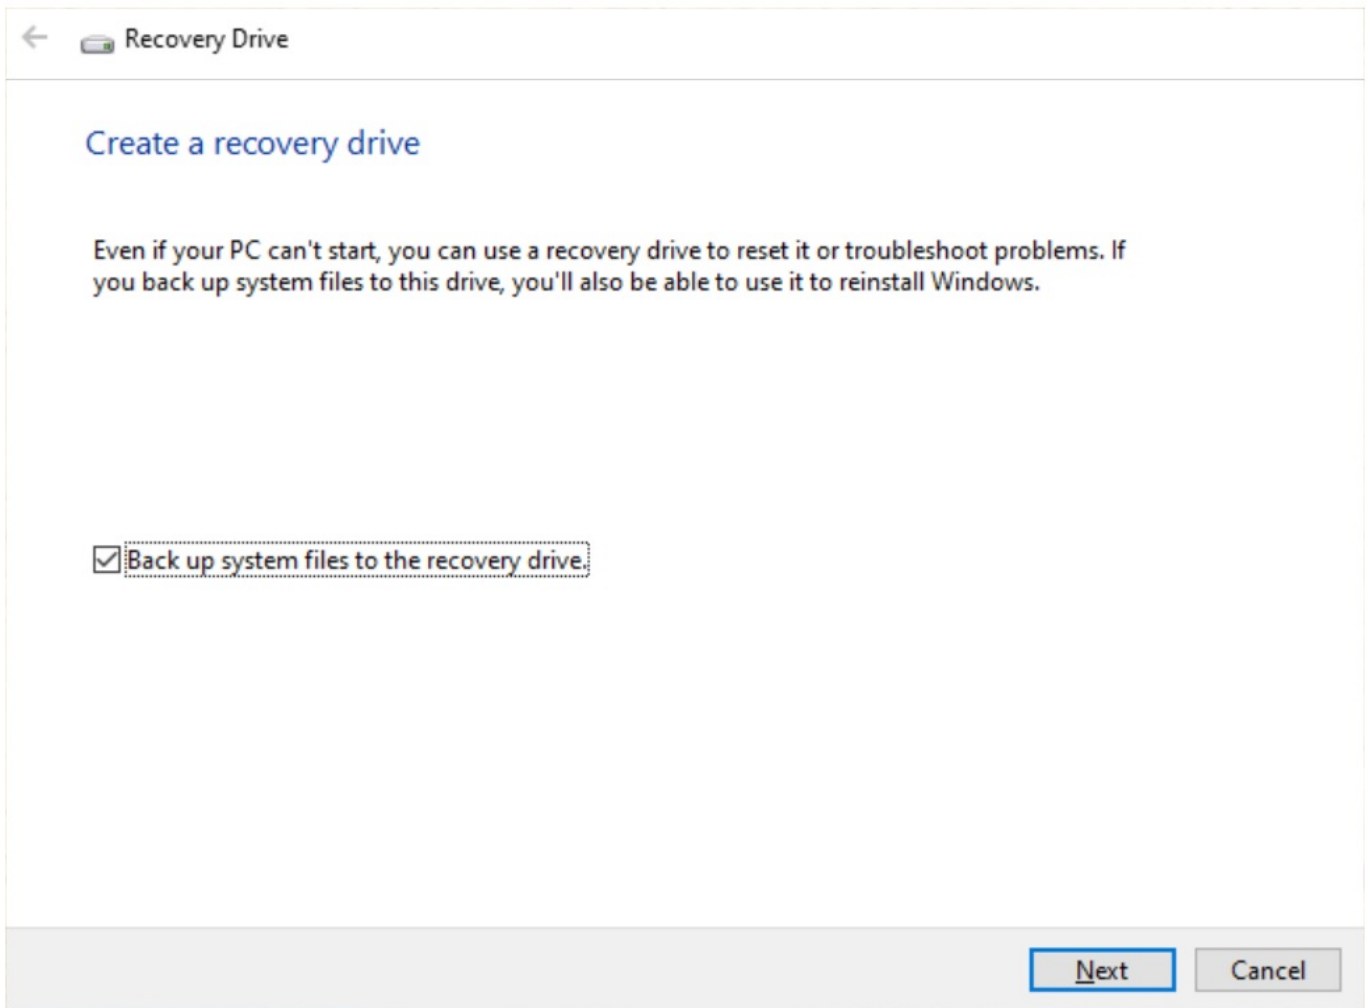

Windowsの再インストール

If "Recovery Drive" is not contained Start menu, Enter the "Cortana" and type "Recovery Drive", then open it.

2. Check "Back up system files to the recovery drive." and click "Next".

Windowsの再インストール
